EXPERIMENT

Title

SIGNATURE FOR LCM

Description

Given two numbers a and b. Find the GCD and LCM of and b.

Input:

- Two positive integers a and b ($1 \leq a, b \leq 1000$)

Output:

For GCD function, an integer representing the GCD of a 'and b

For LCM function, an integer representing the LCM of a and b

Sample Input:

12 18

Output:

6

36

Explanation:

The GCD of 12 and 18 is 6. The LCM of 12 and 18 is 36.

Source Code:

```
import math

def gcd(a, b):
    return math.gcd(a, b)

def lcm(a, b):
    return abs(a * b) // gcd(a, b)

# Read input
if __name__ == "__main__":
    a, b = map(int, input().split())

    gcd_result = gcd(a, b)
    lcm_result = lcm(a, b)

    print(gcd_result)
    print(lcm_result)
```
